

# SQL Query visualizations

Aditya Satpute

A few modifications were made to questions to increase complexity in some cases.

Note: Majority of the visualizations were conducted with connecting MySQL to Tableau and running queries in Tableau.

Not all questions have visuals.

1. What are the customer demographics in terms of gender and number of cars owned. Is there a relationship between them?
2. What are the attributes of customers whose claims were found to be fraudulent?
3. Which are the top 5 most popular car makes and models enrolled with our firm for an insurance?
4. Are cars in certain price ranges more represented in our database than the others, i.e are expensive cars more likely to be insured with our than low range ones? Does this vary by car maker?
5. Does marital status determine the type of car and insurance owned?
6. Who are our top 2 and bottom 2 performing agents in terms of the number of policies sold?
7. Is there any seasonality in accidents? Are there certain months when more accidents occur? What is the YoY change in accident-related claims?
8. Are sports cars more likely to be involved in accidents? Where do most of these accidents occur
9. Is a claim more likely to be a fraudulent in the absence of a witness and if police report wasn't filed?
10. Which are the top 3 policy types and their area of accident

## Question 1

- Majority of the policy holders are Male customers

- Relative percentage of vehicle ownership between male and female policy holders show that most of them are single car owners

- Average age of Males = 40.46 and Females = 37.08

- Majority of policy holders are married

## Question 2.

- Single vehicle owners more likely to submit fraudulent claim
- Males more like to commit fraud than females on aggregate

- Married and Single men more likely to commit fraud than divorced men

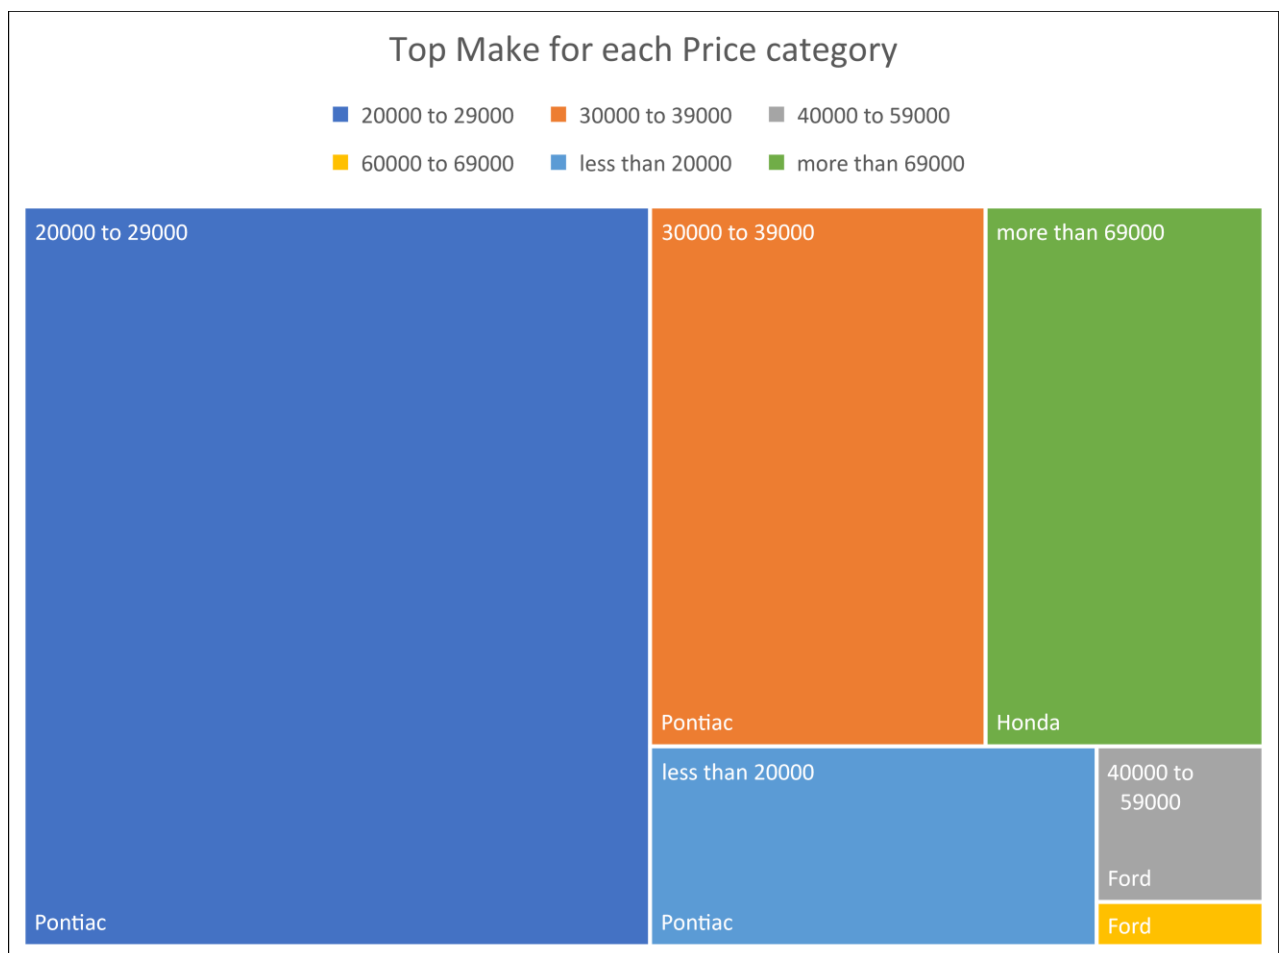

### Question 3.

- Top 5 vehicle categories are Pontiac, Toyota, Honda, Mazda and Chevrolet
- The most preferred category in all 5 makes are sedans

#### Question 4.

- Majority of our customers own low-to mid-range cars. These are in the price range of \$20000 to \$29000.
- Pontiac is the preferred make for this price range

#### Question 7.

- Database contains data from Dec 1993 to Jan 1997.
- YoY the accident claims are on a decline.
- Highest number of accident claims recorded in December 1994
- No observable seasonality in accident claim trends
